# About Us

Problem

# Background

NCDs

Non communicable diseases (NCD's) - A health disease (often) chronic, needs regular health checkups and is often caused due to a combination of genetic, physiological, lifestyle and/or environment

Post treatment care

Post treatment care plan is often developed to ensure accelerated recovery and prevent relapse.

## NCD's

- One of the major challenges for public health in the 21 st century.
- Accounts for 71% of global deaths each year.
- Accounts for 63% of deaths in India each year i.e around 5.8 million people
- 1 in 4 Indians are at high risk of dying because of NCD before the age of 70.

**2016 TOTAL POPULATION:** 1 324 000 000  
**2016 TOTAL DEATHS:** 9 569 000

### PROPORTIONAL MORTALITY\*

Overburdened  
hospitals

Lack of Preventive  
care systems

Untrusted  
Information

Fear and  
Depression

# Issues at hand

Why do we need Phoenix?

# What is Phoenix

## What is it?

Phoenix is a **digital** health and **rehabilitation** platform that provides services such as **personalized health plan**, one-on-one patient **interaction** and **feedback**, regular checkups and continuous **monitoring** with the support of **allied** healthcare ecosystems.

Phoenix takes a **holistic** post treatment-care tracking approach to keep users healthy, and motivated thereby accelerating recovery and preventing relapse.

## How does it work

Get consent from patient to access their data

Allow patient to choose from Allied healthcare ecosystem

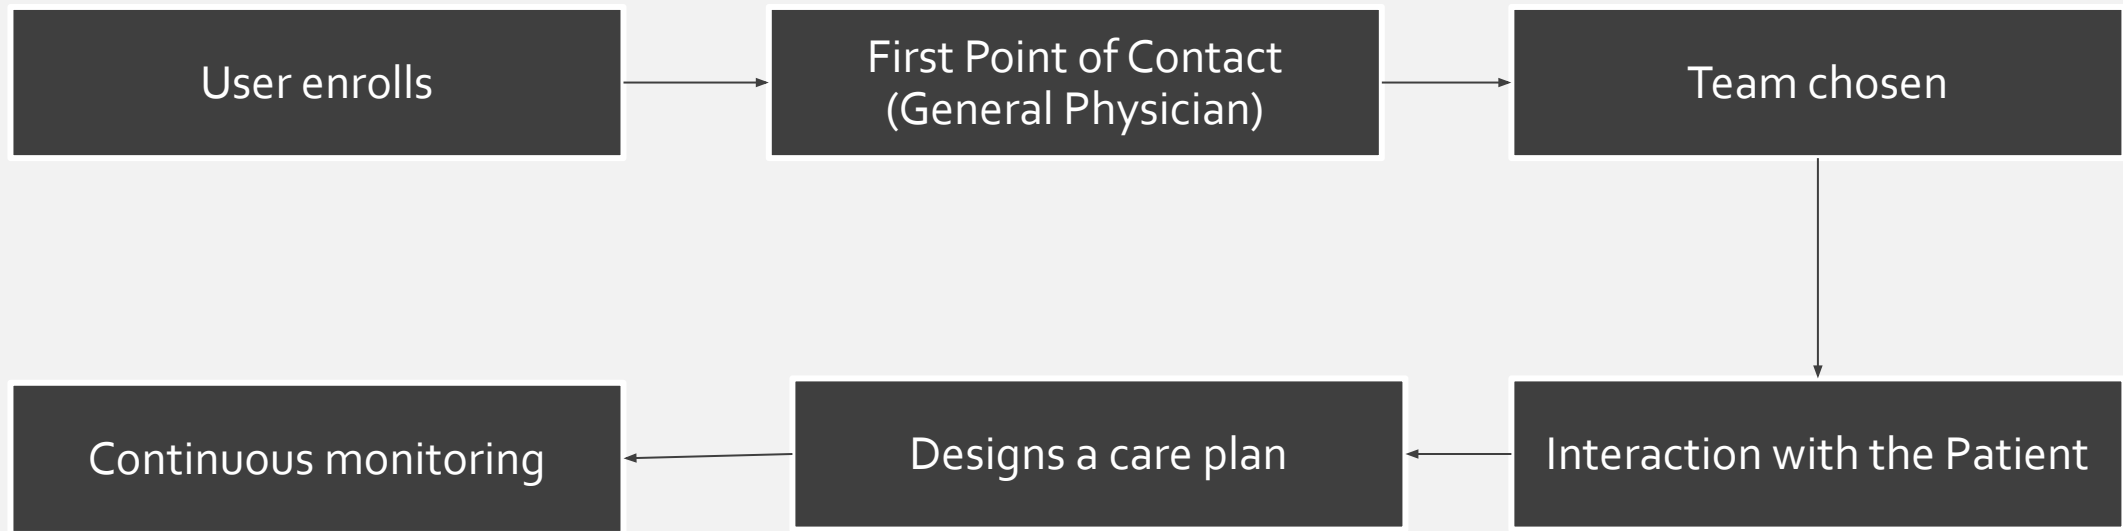

Design a care plan and keep check on the patient

Allow patient to interact in real time

# Phoenix - at a glance

Made with  
**Animaker**

# Value proposition

What makes Phoenix unique?

# Phoenix - USP

- One stop solution for linking treatment and post treatment plans
- Personalized post-care plan
- Seamless way of tracking medical history

A close-up photograph of a stethoscope resting on a document with horizontal lines. The stethoscope has a blue tube and a silver chest piece. The document appears to be a medical or business form. The image is darkened to serve as a background for the title.

# Business Model

# Business Model Overview

## Our target audience?

- Patients
- Hospitals
- Insurance buyers

## Reaching target audience

- Tie up with hospitals
- Medical covers through corporate firms
- Insurance plans

## Approach to roll out model

### Affiliates

Partner with hospitals ,diagnostic, pharma institute to share medical data with consent

### Membership

Freemium mode of membership

### Insights

provide premium insights from the data shared by the members

# Benefits & Challenges

## Auxiliary Benefits

- Acquisition of data for research purposes
- Data analytics and Trends
- Connecting Allied health care sector with patients

## Challenges

- Data Security
- Compliance
- Validating AYUSH support systems
- Widespread adoption

A close-up photograph of a medical stethoscope with a teal tube and silver chest piece, resting on a medical chart with horizontal lines. A blue pen is visible in the background. The text 'Thank you' is overlaid in white on the right side of the image.

Thank you
